Model Interpretation

The data is preprocessed: Cleaned, merged and features were engineered as per requirement

Interpretation - Following were the learnings from the model:
- **The model successfully predicted the estimated stock levels based upon the given data**
- **It ruled out the supposition that product categories were a factor in estimation stock levels**
- **It stated the following as important factors for the task (in order):**
  - **Unit Price**
  - **Hour of the day**
  - **Quantity**
  - **Day of the week**
  - **Day of the month**
